

International Cooperation

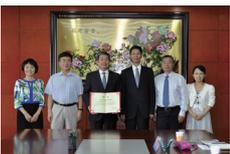

CEO of Environmental Systems Research Institute (ESRI) Jack Dangermond visits IWHR and lectures on GIS-enabled smart water management

Chief Executive of International Hydropower Association (IHA) Richard Taylor visits to talk on 2017 IHA World Congress and bilateral cooperation

Faculty members and students from the University of Washington visits IWHR conducting exchange activities with students from IWHR while promoting mutual understanding

Incheon National University Professor Choi Gyewoon (former K-Water CEO) visits IWHR and lectures at Global Vision Forum on water cooperation in Asia

Research Progress

Beijing IWHR Technology Co. Ltd. (BITC) completes the turnkey project of Kozbuku Hydropower Station, the third electro-mechanical project of such type in Turkey

IWHR compiles a special planning on sponge city development for Xiamen City that integrates infiltration, detention, storage, purification, utilization and drainage

IWHR organizes the research and implementation of managing and monitoring technology of safe water supply in rural areas and information system development

IWHR effectively controls water bursts in a diversion tunnel of hydropower station, overcoming difficulties of cracks, large flow, high pressure, and short distance between bursts and springs
